SOEN341 - Acceptance Tests

Test Case US #8		
User Story: As an admin, I want to add product so that other users can view them on the browsing page		
Pre-condition: Log into the website as admin		
Steps	Expected Results	Actual Results
Enter the name, price, image, and description of the item in the provided text fields on the Admin page	The information will be written in the fields describing the item.	The information is written and shown in the fields as desired
Click on the "Add Product" button at the bottom of the page	The item should be saved into the database (firebase)	The items added are found in the database
Click on the website's logo at the top left corner	The user will be redirected to the home page	The user is brought to the home page of the website
View the added items on the browser	The new items that were added by the admin should be shown on the homepage with their information	The name and the price of the item is shown, however the image is not displayed
Results: Everything works except for the display of the product's image. PASS
